

The background is a solid light blue color. It features several large, overlapping, organic shapes in various shades of blue, ranging from a very light, almost white blue to a medium blue. These shapes are fluid and wavy, creating a modern, abstract aesthetic. The shapes are distributed across the frame, with some appearing more prominent than others.

# ACCOUNT ACTIVATION

Copyright © 2020 Odyssey Prime B.V. All rights reserved.

For optimal functioning of the platform, we recommend using Google Chrome as your browser.

The following 3 sheets explain how to install Google Chrome.

If you have Google Chrome already installed, you can skip these steps and continue on page 8.

Manual PRIME Platform

Open Internet Explorer and go to  
<https://www.google.com/intl/nl/chrome/>

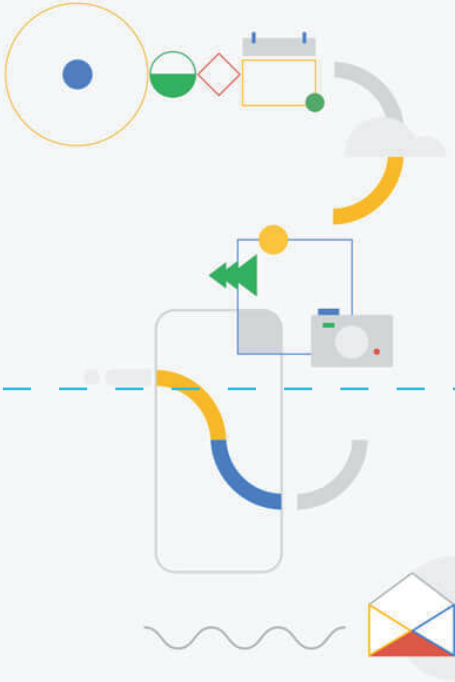

Click on 'Chrome downloaden'.

Google Chrome-webbrowser x +

google.com/intl/nl/chrome/

Apps PRIME General - Co... Cheatsheet | Font A... Odyssey Prime B.V.... PRIME Search | unDraw System dashboard... Grid Calculator by... WeTransfer (1) Facebook Create a pal

Google Chrome Extensies

# Doe meer met het nieuwe Chrome

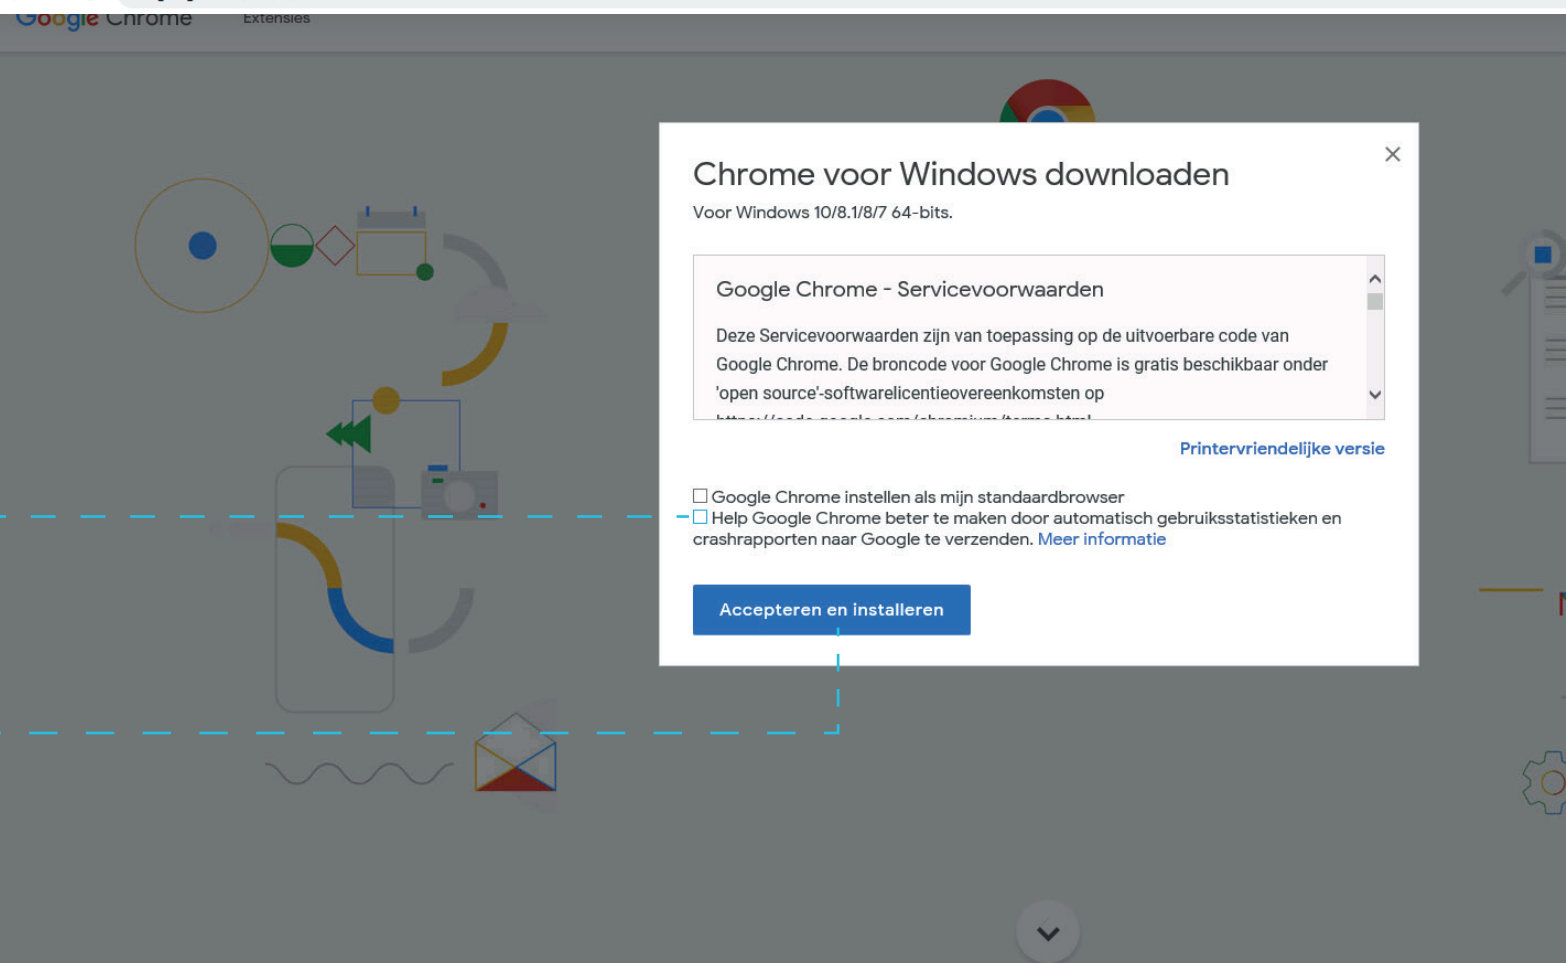

Nu nog eenvoudiger, veiliger en sneller met slimme Google-functies ingebouwd.

**Chrome downloaden**

Voor Windows 10/8.1/8/7 64-bits.

☒ Help Google Chrome beter te maken door automatisch gebruiksstatistieken en crashrapporten naar Google te verzenden. [Meer informatie](#)

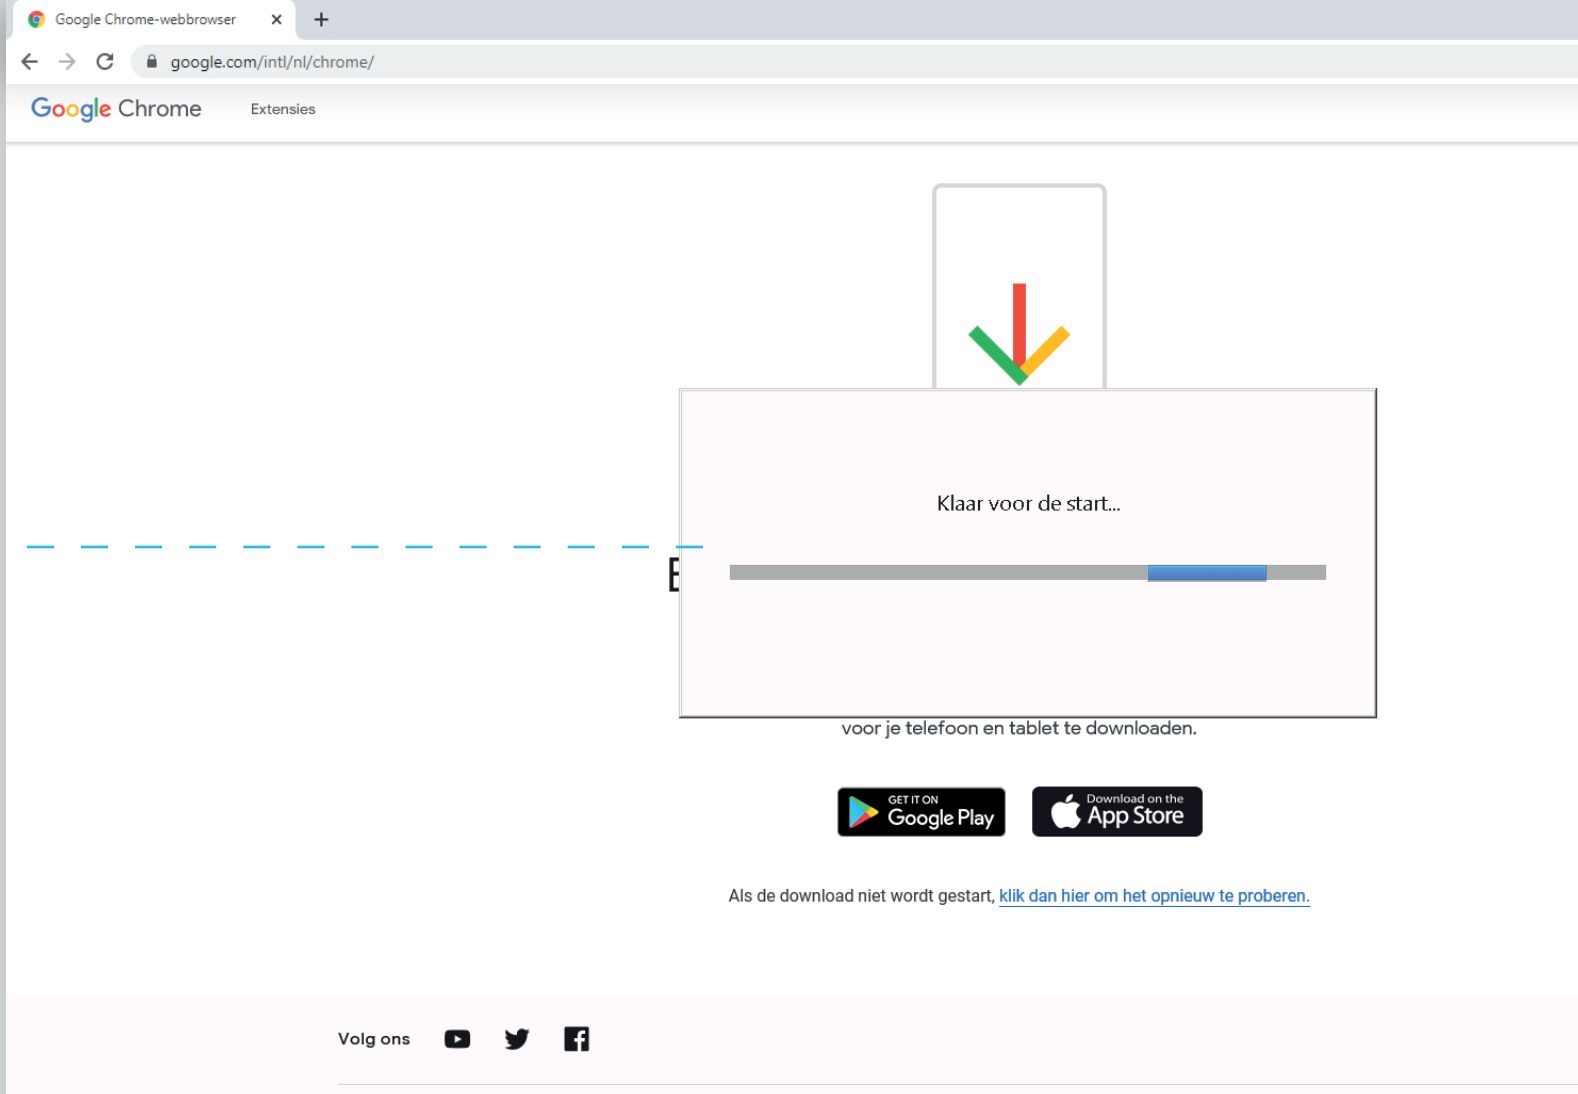

Door Chrome te downloaden, gaat u akkoord met de [Servicevoorwaarden van Google](#) en de [Aanvullende servicevoorwaarden van Chrome en Chrome OS](#)

These options are not necessary  
and can be turned off.

Click on 'Accepteren en installeren'

Complete the installation and Google Chrome will open automatically.

Open Google Chrome.

You should have received an invitation by email to activate your account.

(note: the mail may have ended up in your spam folder).

If this is not the case, please contact your system administrator to receive the invitation again.

Click on this link in the e-mail and make sure the link opens in Google Chrome.

invitation to  
join PRIME

Hi there,

PRIME is the intuitive data and analytics platform for all business professionals. If you have any questions, then please get in touch with your system administrator.

Create my account

Cheers,  
The team at PRIME

Enter your first and last name and choose a username of your choice.

Set up and confirm a password.

Click on 'Go To Login'.

Login

To ensure the security of the data available in the platform, we use Two-Factor Authentication (2FA) as an extra security layer.

Click on 'Set it up!' to go to the next step.

**You have currently not activated two-factor authentication**

**Please take a moment to set up two-factor authentication.**

For security reasons, your system administrator has set two-factor authentication as mandatory. Besides providing your personal login name and password, this means that you will also have to generate a 6-digit code on your smart device. This way, we know it's you.

Set it up!

For the Two-Factor Authentication, you can use “Duo Mobile” for which we will show a step by step guide on the following pages, or a similar mobile app. You can download the app on your phone for free in the App Store (iPhone) or the Google Play Store (Android).

### Installation

1) Download Google Authenticator, Duo Mobile or another 2-Step Verification codes generator app from the App Store (iPhone) or Google Play Store (Android):

2) Scan the QR code with your authenticator app. This will add the PRIME platform account to your app.

#### Backup Codes

12345678  
82736473  
23746812  
87346817  
01263723

3) Print the backup codes. The backup codes can be used in the scenario that the authenticator app is not available to you (for example, a lost phone).

- ☒ Download Backup Codes (Recommended)  
☐ Already got them

NOTE: After submitting the form the backup codes will be downloaded automatically

### Confirmation

Open your authenticator app and get the secure code from the account you've just added.

6 digit code:

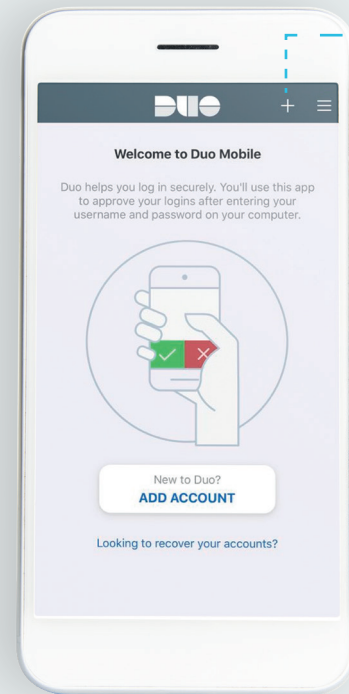

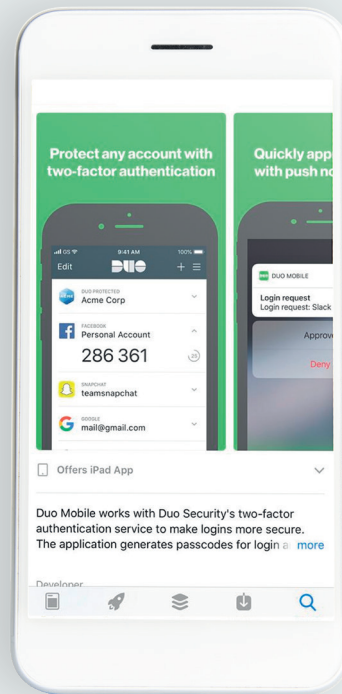

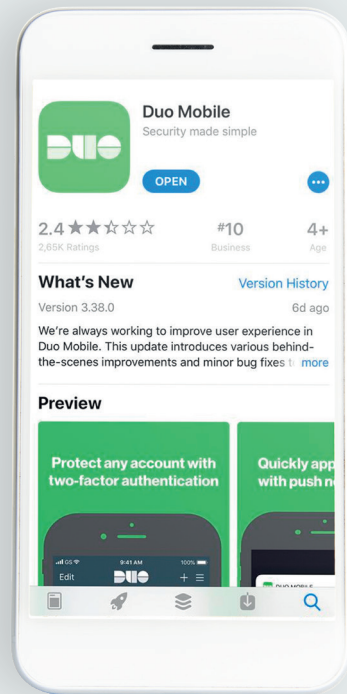

---

[Complete](#)

Open on your smartphone the App Store of Google Play Store.

Search for 'Duo Mobile' and install the app.

Open the App when the installation is complete.

Click on the plus sign to add an account.

Scan the QR-code on your screen with your phone to add the account in the Duo Mobile app.

### Installation

1) Download Google Authenticator, Duo Mobile or another 2-Step Verification codes generator app from the App Store (iPhone) or Google Play Store (Android):

2) Scan the QR code with your authenticator app. This will add the PRIME platform account to your app.

#### Backup Codes

12345678  
82736473  
23746812  
87346817  
01263723

3) Print the backup codes. The backup codes can be used in the scenario that the authenticator app is not available to you (for example, a lost phone).

- ☒ Download Backup Codes (Recommended)  
☐ Already got them

NOTE: After submitting the form the backup codes will be downloaded automatically

### Confirmation

Open your authenticator app and get the secure code from the account you've just added.

6 digit code: \_\_\_\_\_

[Complete](#)

Select this option.

By selecting this option,  
back-up codes are automatically  
downloaded as a PDF-file.

Enter the 6-digit code from the  
Duo Mobile app on the website to  
complete the setup of the Two-  
Factor Authentication.

#### Installation

1) Download Google Authenticator, Duo Mobile or another 2-Step Verification codes generator app from the App Store (iPhone) or Google Play Store (Android):

2) Scan the QR code with your authenticator app. This will add the PRIME platform account to your app.

#### Backup Codes

12345678  
82736473  
23746812  
87346817  
01263723

3) Print the backup codes. The backup codes can be used in the scenario that the authenticator app is not available to you (for example, a lost phone).

- ☒ Download Backup Codes (Recommended)  
☐ Already got them

NOTE: After submitting the form the backup codes will be downloaded automatically

#### Confirmation

Open your authenticator app and get the secure code from the account you've just added.

6 digit code:

[Complete](#)

## Keep the back-up codes.

The back-up codes can find under “downloads” on your computer. Save these back-up codes on your computer in a secure environment.

The Two-Factor Authentication has been successfully set up.

Click on ‘Ok, got it!’ to continue to the platform.

PDF-file with downloaded back-up codes.

### Two-factor authentication is enabled

You have set up two-factor authentication. When logging into PRIME, you will be asked to provide a 6-digit code to keep your account secure. You can easily generate this code by opening the authenticator app on your smart device and by selecting your PRIME account.

Please note that you have automatically downloaded a PDF file that contains your personal back-up codes. In case something goes wrong, you will be able to login to your PRIME account via these back-up codes.

For security reasons, we strongly recommend the following actions:

- Print out your personal back-up codes on a piece of paper and store it somewhere safely
- Save and store your personal back-up codes in a password manager
- Delete the PDF file from your computer

Please reach out to your system administrator if you need any assistance.

[Ok, got it!](#) [Disable](#)

Open the Menu and click on  
"User Management"

The screenshot shows a web browser window with the URL [google.com/intl/nl/chrome/](https://google.com/intl/nl/chrome/). The PRIME Platform interface is displayed, featuring a dark blue sidebar navigation menu on the left. The menu includes the following items: Settings, User Management, Access Management, Dashboard Management, and a search bar. The main content area is titled "Welcome Back" and displays a "Status Update" section with two metrics: "0 Targets Set" and "0 Alert Triggered". Below this, there is a section for "Pinboards" with a message "There are no bookmarks yet!". On the right side, there is a green box with the text "There are no t" and a white box with the text "0 Cockpits" and "There are no results". The bottom right corner of the interface shows a "View all" link.

Create User

Create User Invitation

To invite someone, hover over the add button and click on “Create User Invitation” (Recommended).

You can manually create a user via “Create User” option.

Fill in the email-address of the user you want to invite.

From the dropdown list choose one of the predefined user roles.

Each user has certain privileges, such that a:

- **Basic User** - monitor and view.
- **Business User** monitor, view and take action.
- **Analytics User** - Perform Data Analysis and Analytics
- **Admin User** has administrator rights, which gives her/him full permissions.

Send Invitation

Choose the groups which you want the user to become a member of. All the content set for these groups will be visible to this user.

To have a higher level of security, make sure 2FA is selected.

Click on **Send Invitation** and the user will receive an invitation as shown in the account activation part.

The screenshot shows the 'User Management' interface. At the top, there's a header with the PRIME logo and 'User Management'. Below it, there are tabs for 'Users' and 'Groups', a search bar, and options for 'Sort' and 'Filter'. The main content area shows a user profile for 'Jane Adams' with a 'Basic User' role. A 'User Invitation' modal is open, displaying fields for 'Email \*', 'Role \*' (a dropdown menu), 'Groups \*', 'Permissions', 'Viewers', and 'Editors'. The 'Force Two Factor Auth' checkbox is checked. A 'Send Invitation' button is at the bottom right of the modal. Dashed blue lines connect the instructional text on the left to the corresponding fields in the modal: 'Choose the groups...' points to the 'Groups \*' field; 'To have a higher level of security...' points to the 'Force Two Factor Auth' checkbox; and 'Click on Send Invitation...' points to the 'Send Invitation' button. On the right, another dashed blue line connects the text 'Write down who can view this user or 'Public' if everyone should.' to the 'Viewers' field.

Update Board

A dashboard Demo with 2 sub-dashboards:

- Quarter 1 - 2020
- Quarter 2 - 2020

If you want this board to be under another one put that dashboard as the Parent.

On a dashboard with sub-dashboards we can decide to show them in Tabs or on their own pages.

Germany / Demo

Germany / Demo / Quarter 1 - 2020

Quarter 1 - 2020

Quarter 2 - 2020

In a dashboard with **tabs** this is how a sub-dashboard will appear.

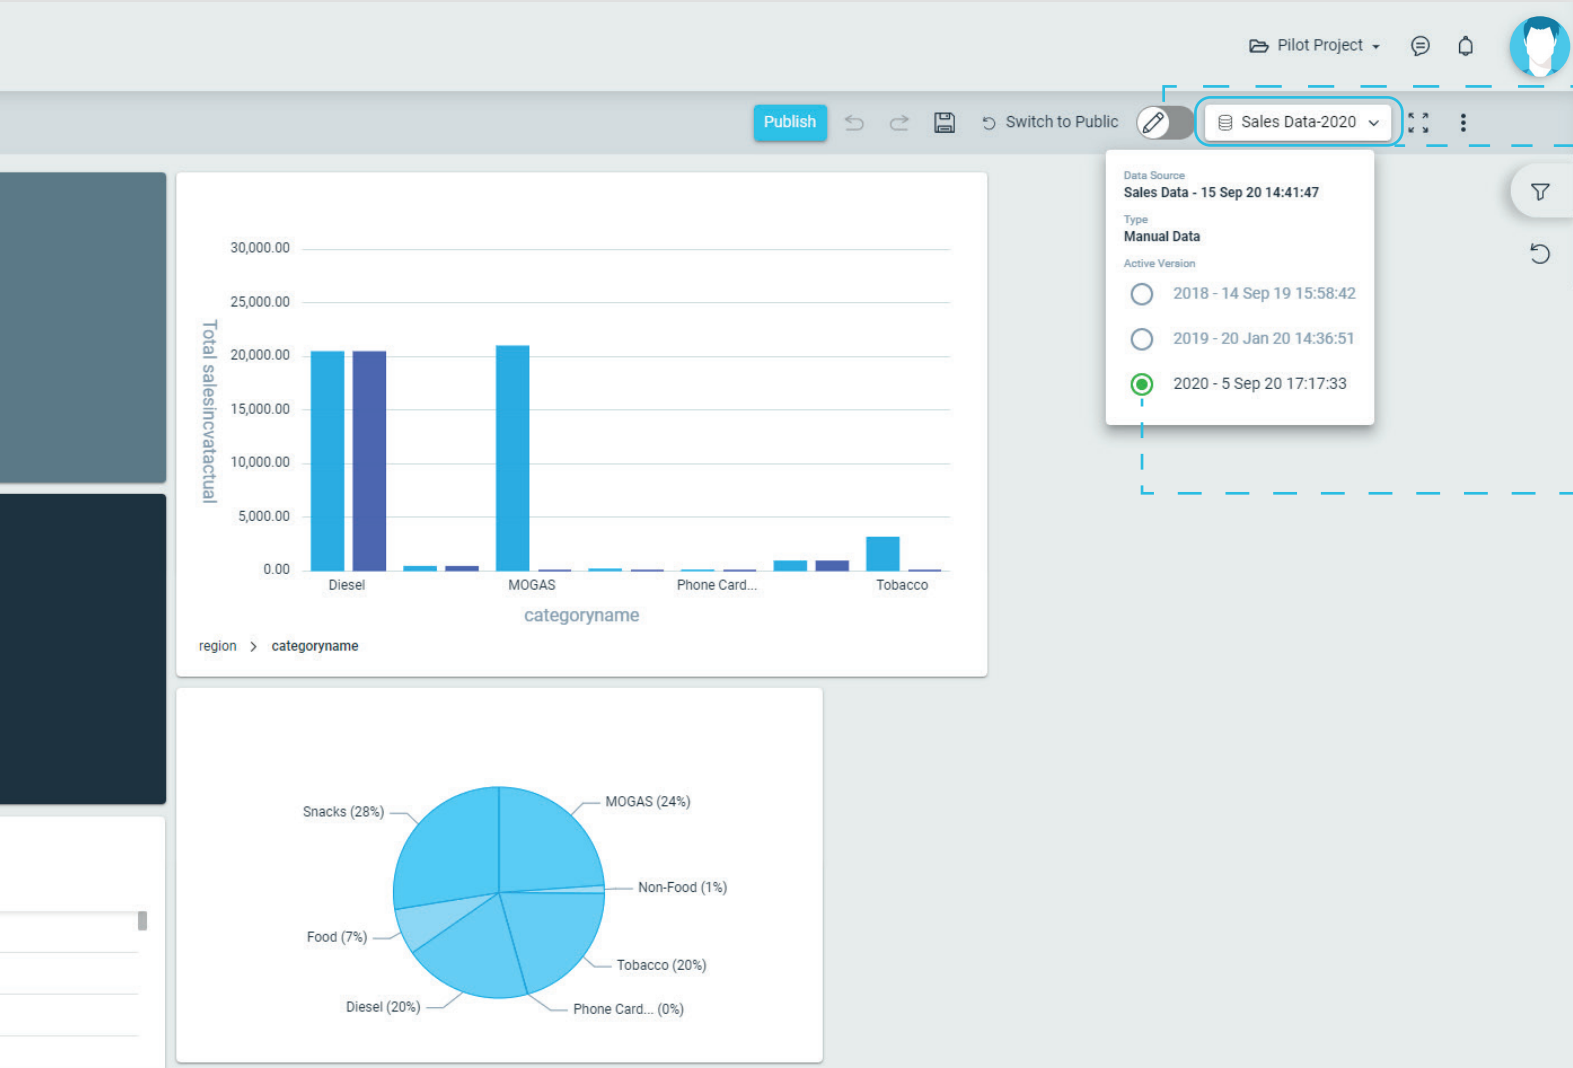

In the other case, the sub-dashboard has its own page.

# DASHBOARD OPTIONS

Copyright © 2020 Odyssey Prime B.V. All rights reserved.

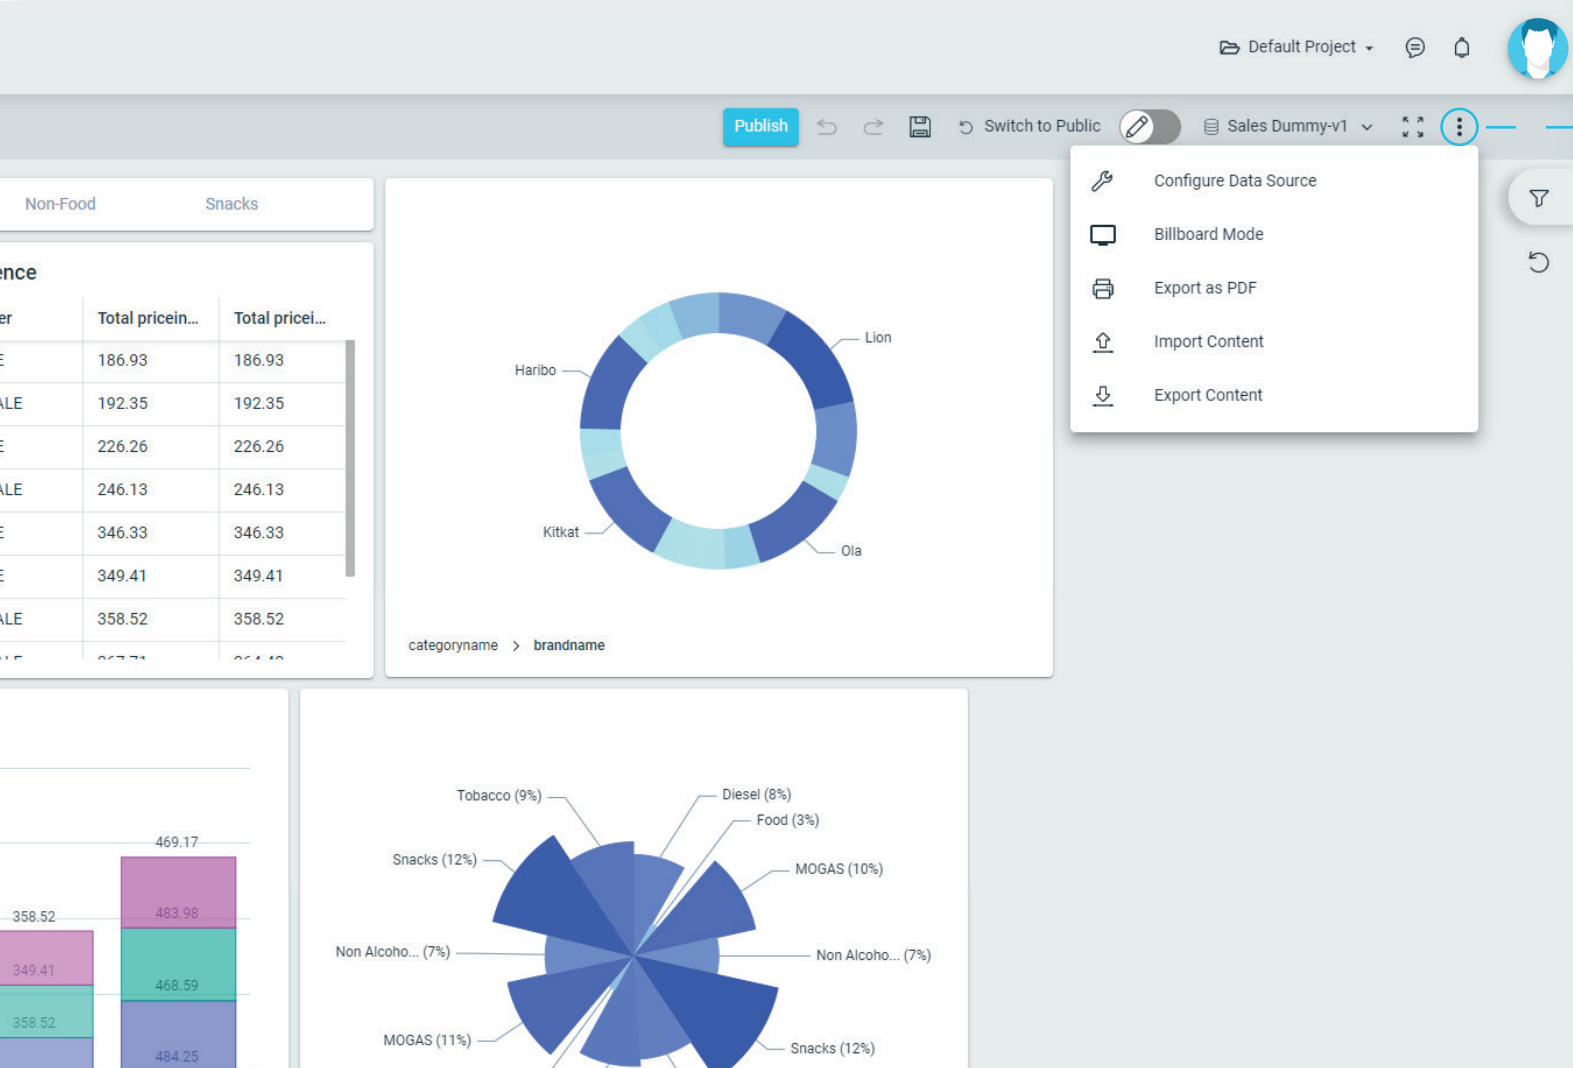

Switch between **View** and **Edit** Mode depending whether you are presenting or working on the dashboard.

The data source and version the dashboard is using.

You can switch between the different versions of the data source by clicking on them (when, for example, you want to see the data insights from two different weeks)

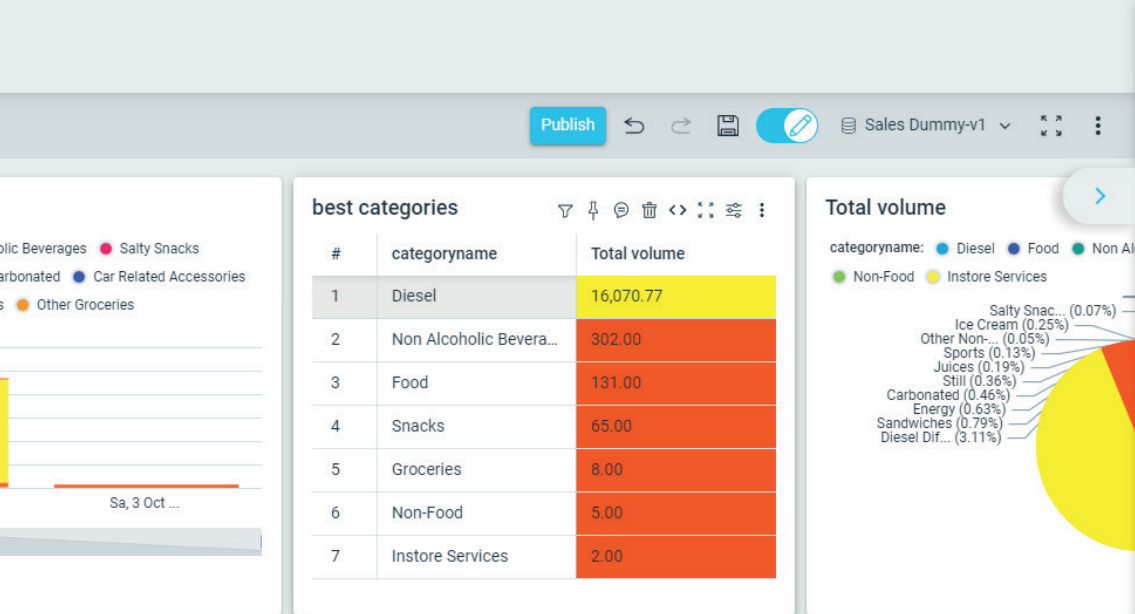

The dashboard will be shown in the selected version.

View more options by clicking here.

The dashboard can be in **Billboard Mode** or **Presenter Mode**. Change to Billboard Mode if you want the widgets to take more vertical space

The dashboard can be imported and exported to transfer the content from/to another dashboard. The data source schema of the source (exported dashboard) and the destination dashboard must match.

Dashboard Appearance settings panel.

Choose one of the legend alignment positions to make it appear on the widget.

Turn on coloring to let the data take different colors depending on its values.

You could specify a gradient with multiple stops depending on a min/max value, or in the case of category data, add a rule based color that the data takes when it matches that value.

We have chosen a two color gradient for the Total count field and have put its legend on top of the graph.

Format display number

Metric:

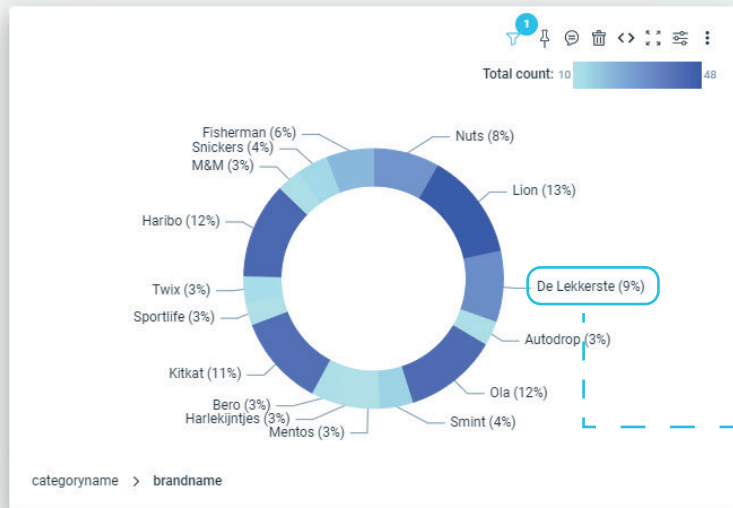

Number format:  Unit:

Colors can have shades to make different values more visible.

You can't change this option on some widgets like the pie charts since displaying everything with one color would make it impossible to see the separation between different values.

Sometimes we don't need to write a title, so a workaround to hide the title placeholder is to put 0 as the font size for the Title.

We see that the label length is 10, but since we have space to show more characters, we go and change that.

The image shows a screenshot of the 'Configure Widget' dialog in the Power BI mobile app. At the top, there's a title bar with a funnel icon, a filter icon, a pencil icon, an information icon, and a refresh icon. Below this is the 'Configure Widget' header. The main area is titled 'Select Widget' and contains a grid of 48 widget icons. The icons are arranged in 6 rows and 8 columns. The first row includes bar charts, line charts, pie charts, and maps. The second row includes tables, grids, and other data visualizations. The third row includes more complex visualizations like treemaps and sunbursts. The fourth row includes icons for filters, sorting, and other interactive elements. The fifth row includes icons for different data sources and connectors. The sixth row includes icons for different types of reports and dashboards. Below the grid is a section titled 'Filter Field' which contains a dashed box with the text 'Select Field'.

Turn on the **Exclusion Filter** if these are the values that you want to have excluded.

Turn on the **Single Selection** if you want to switch one value at a time.

From the field value list tick the ones that you intend to use

Sales Dummy-v1

Dashboard Filters

☒ categoryname

☐ Food

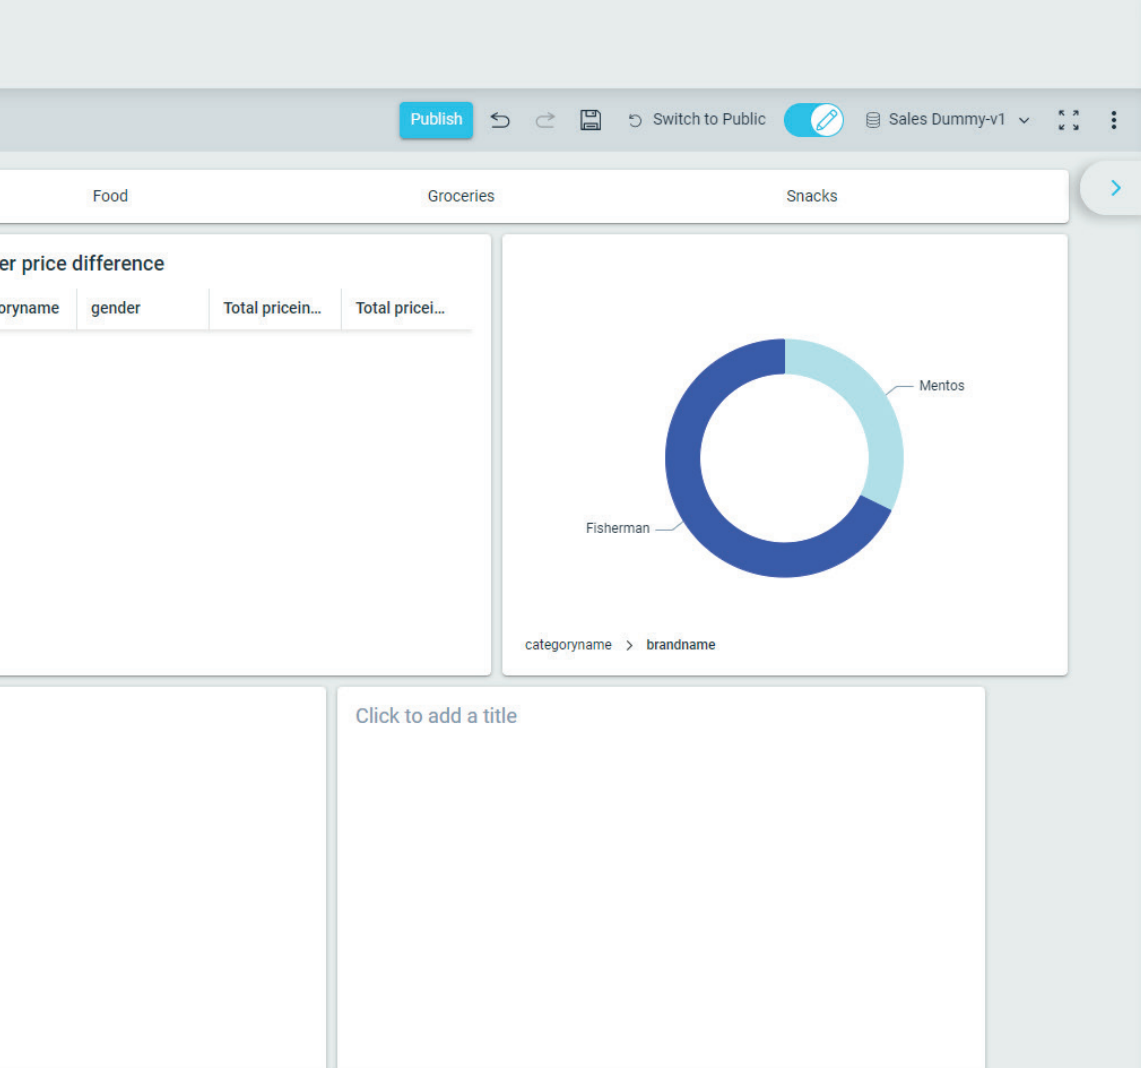

☐ Groceries

☒ Snacks

Select Field

Now we create a filter for the brandname, which is a field related to categoryname.

Since only Snacks is selected on the categoryname, we will get only the brandname values for that category.

Dashboard Filters

**categoryname**

- ☒ Food
- ☒ Groceries
- ☒ Snacks

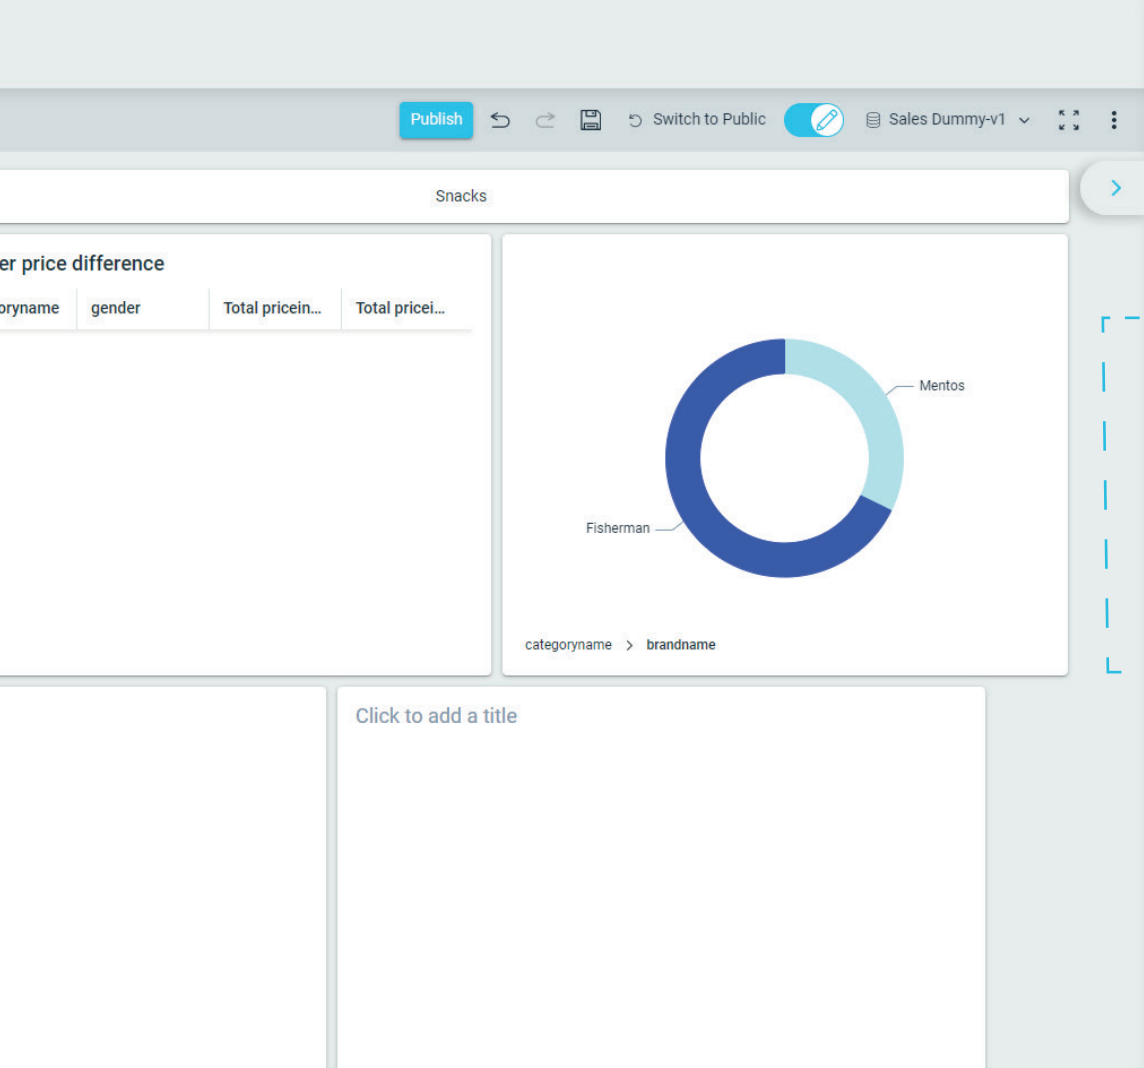

**brandname**

- ☒ Deselect All
- ☒ Ben & Jerry's
- ☒ Fisherman
- ☒ Kinder Bueno
- ☒ Mars

Select Field

At the moment we have a selection of brandnames from Snacks and no categoryname filters.

Since we have put brandname on categoryname's related filters, each time we switch a categoryname value on/off, the brandname selection will be reset.

Dashboard Filters

categoryname

Snacks

brandname

- ☒ Deselect All
- ☒ Ben & Jerry's
- ☒ Fisherman
- ☒ Kinder Bueno
- ☒ Mars

Select Field

Here we see an example of what happens when categoryname doesn't have brandname on its related filters.

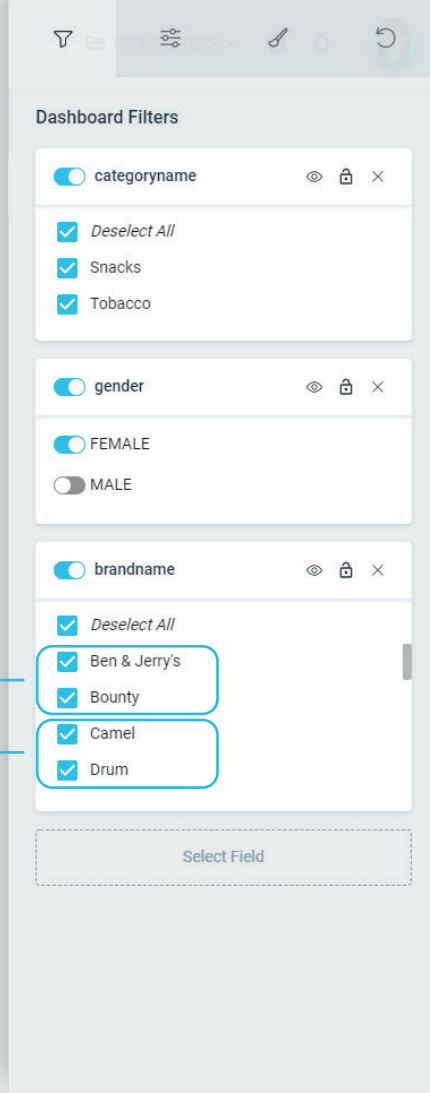

Since all the selected brandname values belong only to the Snacks category, the other categories are not displayed.

To be able to select other categories, disable the brandname filter.

However if we have a multiple selection filter and choose brandname values from more than one category, whenever the categoryname selection changes, the brandname values are remembered and only filtered accordingly.

Edit

After configuring the data source for the first time you should expect to see no data, except the header row with your columns.

To upload data or later change them click on the Edit button.

Note that this button will only be showed to the Uploaders. This setting can be changed on the Manage Workflow step of the Data Source configuration.

If you have no data uploaded yet, skip this page

To view/delete user uploads, click on the Uploads from Users.

To edit data click on the edit button on the corresponding row.

To change which columns are shown, click on the Visible Columns button and (de)select columns.

## Uploads from Users

Import CSV/XLS/JSON

Insert Data

To add new data hover over the add button.

If your data exist on a file then choose the Import CSV/XLS/JSON option.

Otherwise you can add new rows by clicking on Insert Data.

Choose File

Column Mapping

Analyse

Submit Data

To import data, upload the same file as when designing the Data Source.

Drag & Drop Files here or  
[Browse through your computer](#)

Cancel

Previous

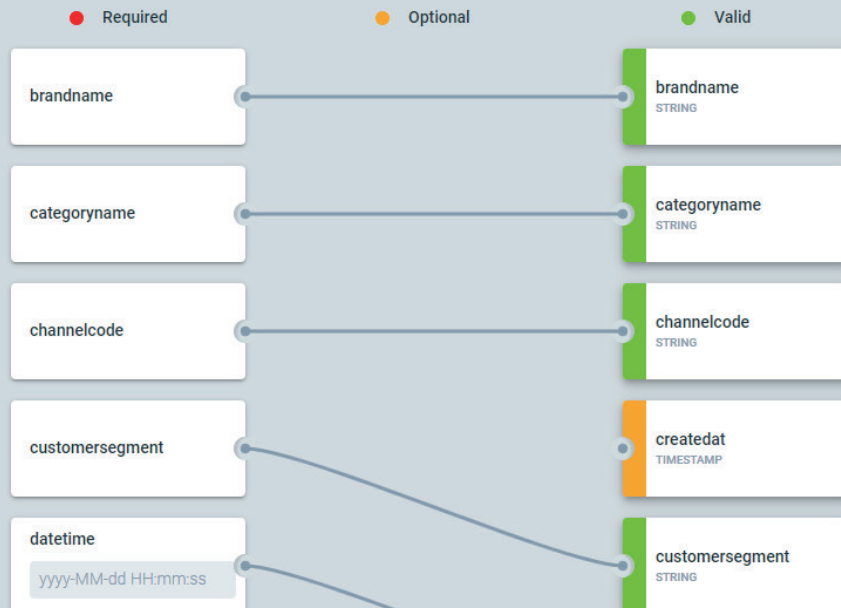

Next

After uploading the file, map your data columns to the ones already configured.

The nodes on the left represent the columns of the data you just uploaded and have a port which you should link to the respective column on the right.

Note that some columns (decimals, date/time, etc.) need their format to be specified in order to be correctly extracted.

In this step, data is analyzed for any errors in structure or missings.

Analyze the data.

Define your data separator.

25\_Test\_Data.csv X

Comma Delimiter (,) ▼

Cancel

Previous

Submit Data

After running the analysis you will get an overview of your processed data.

The malformed values are displayed in red.

In this example we can see that the format of the datetime column is:

**yyyy-MM-dd HH:mm:ss Z**

and the default timestamp format is

**yyyy-MM-dd HH:mm:ss**

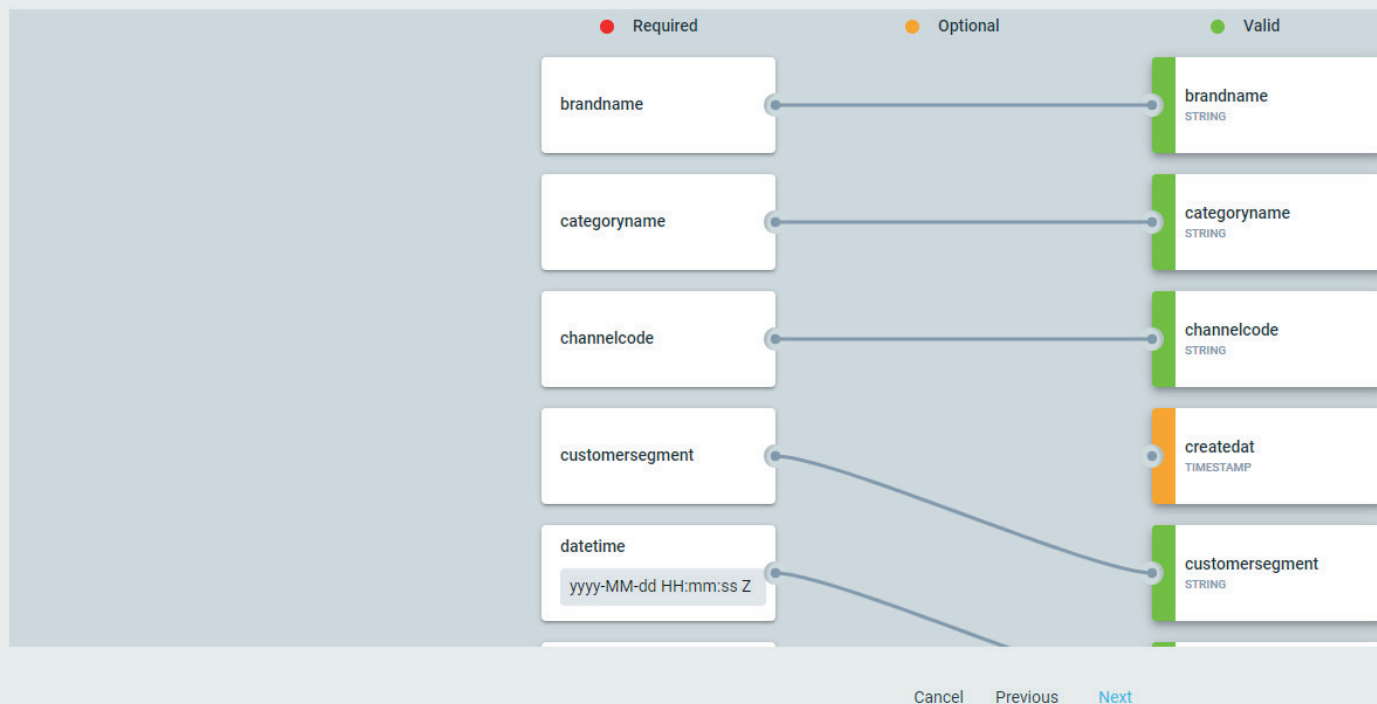

27387 Total rows(s) 0 Valid rows(s) 27387 Malformed row(s) 0 Invalid row(s)

Showing 50 / 27387 Total rows(s)!

#	brandname	categoryname	channelcode	createdate	customersegment	datetime	discountvalue	gender	lineitemid	m2	marginvalue	numberoftransactions
1	ProdL	Diesel	9999	-	Young adults	2015-10-01 00:00:22 +0200	0	MALE	1	1100	0.19	118
2	Prodf	MOGAS	9999	-	Young adults	2015-10-01 00:14:28 +0200	0	MALE	1	1100	0.14	107
3	Prodf	MOGAS	9999	-	Working class	2015-10-01 00:16:27 +0200	0	MALE	1	1100	0.14	120
4	Prodf	MOGAS	9999	-	Working class	2015-10-01 01:10:36 +0200	0	MALE	1	1100	0.14	123
					Working class	2015-10-01						

So we must go back to Column Mapping and put down the correct format of the datetime column.

Data Sources

d

Filter On

Available Pipelines.

Create a new Pipeline.

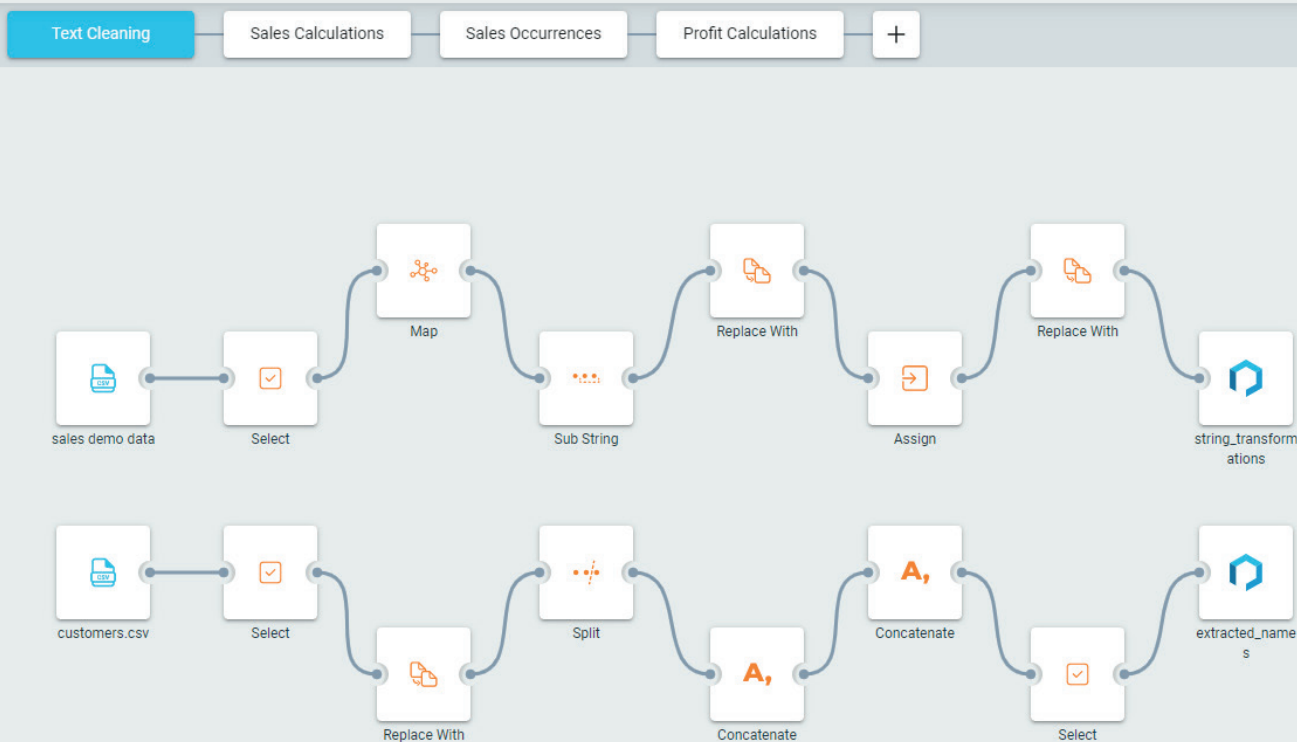

Pipelines present a way to visually do data transforming, cleaning and analysing by connecting different configurable modules.

These pipelines can be run on demand or be scheduled periodically. You can choose whether a stage will be executed or not during this run.

Every stage pipeline should contain at least two Connectors, starting with an Importer and ending with one or more Exporters. In between you can add as many Processor and Analytic modules as you want.

After connecting a module to the existing pipe you can see column statistics and an overview of the data at that step.

Primary Stage

The site map of the current pipeline, starting from the current project, going to Visual Data Hub, in the **Demo Pipeline** pipeline topic with version **0.1**.

A pipeline topic can have multiple versions representing different pipeline logic and structure.

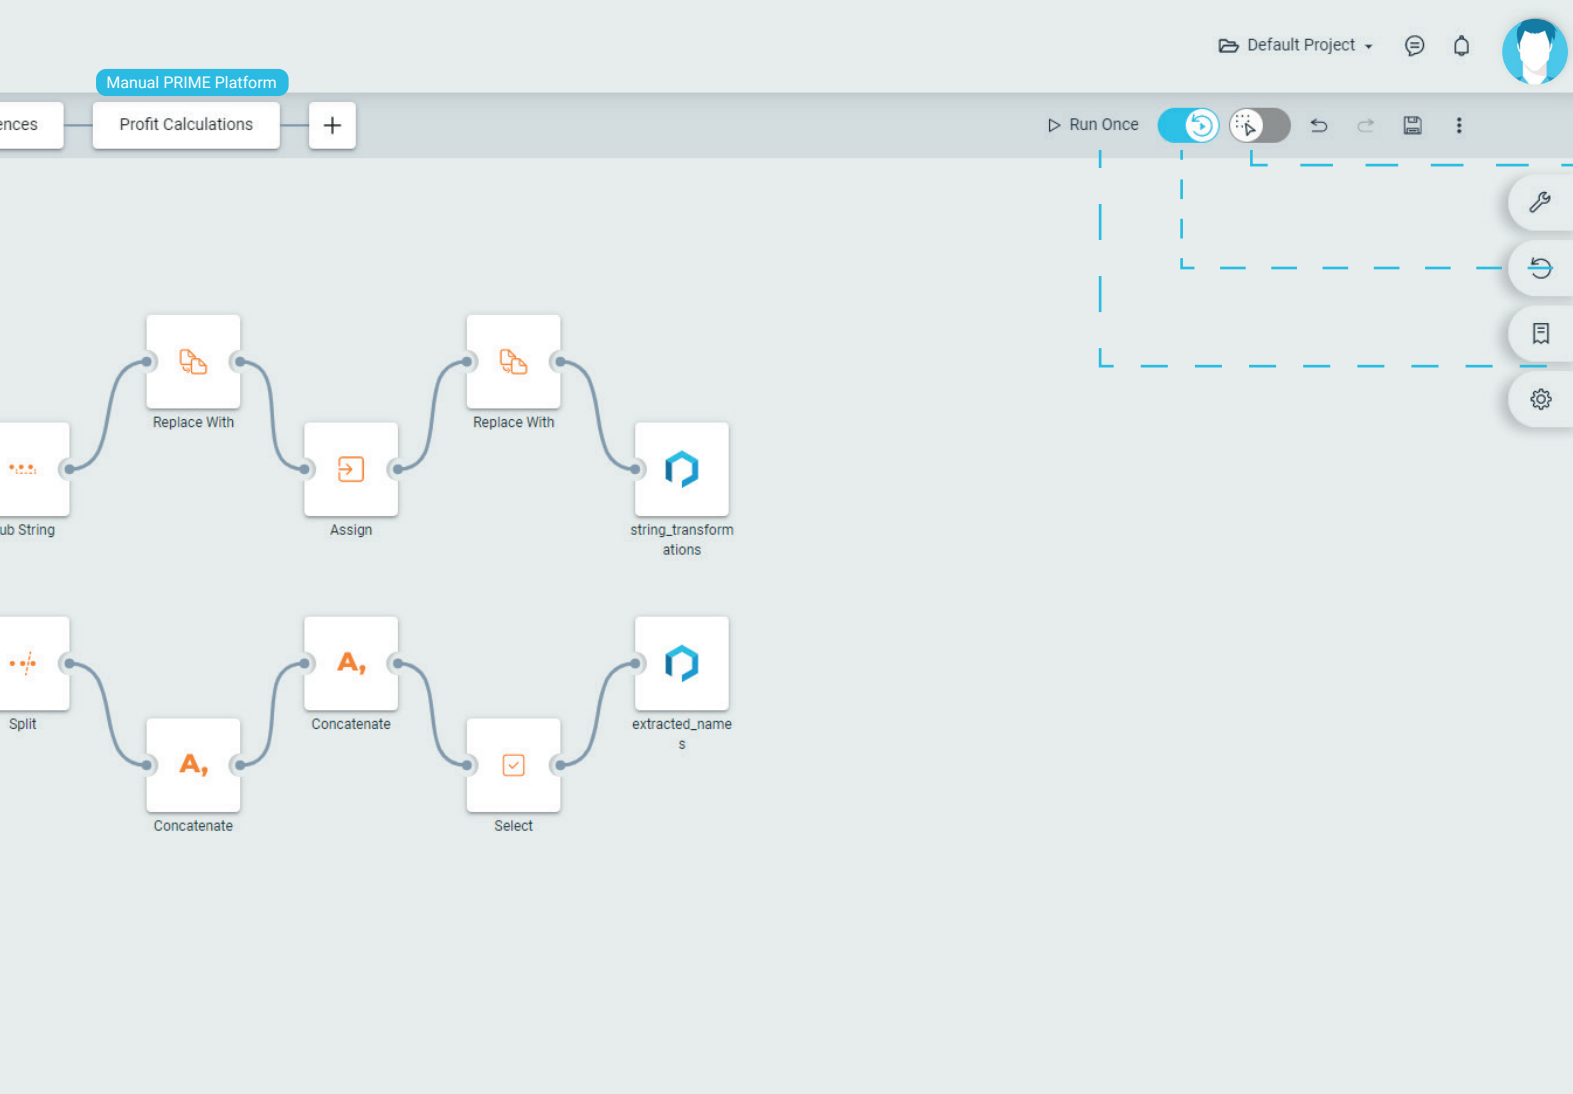

Working Stage.

Add more stages to your pipeline to separate concerns by grouping data transformations of the same type, i.e., Data connector, Data Cleaning, Data Processing stage, etc.

## Start by dragging the workspace

Create and automate a data pipeline to

Switch between drag and select mode.

Choose whether this stage will be executed or not during the **run**.

Run pipe once.

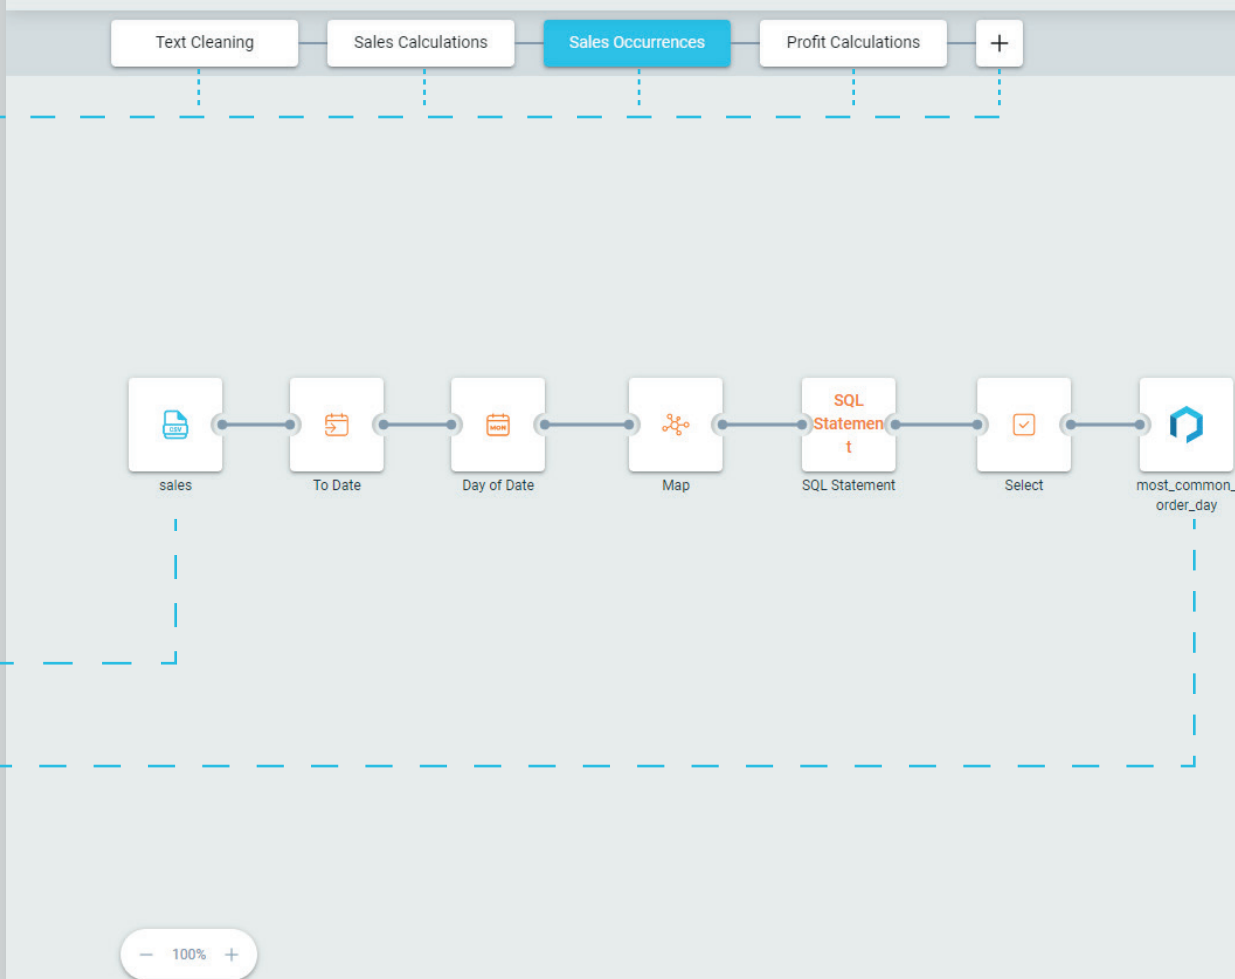

## Manual PRIME Platform

This is your Pipeline, which consists of multiple stages. Here you can create/edit and remove stages.

Drop and connect Modules starting from importers continuing with available processors to clean, prepare and process all your data. Save those data in the given Exporters, so you can visualize those in the Dashboards.

CSV Importer.

Data Lake Exporter.

Text Cleaning

Sales Calculations

Sales Occurrences

Profit Calculations

Preparing Data

When configuring a pipeline, if the modules are not properly configured, they will appear outlined in a color.

When a module is outlined in:

### Orange

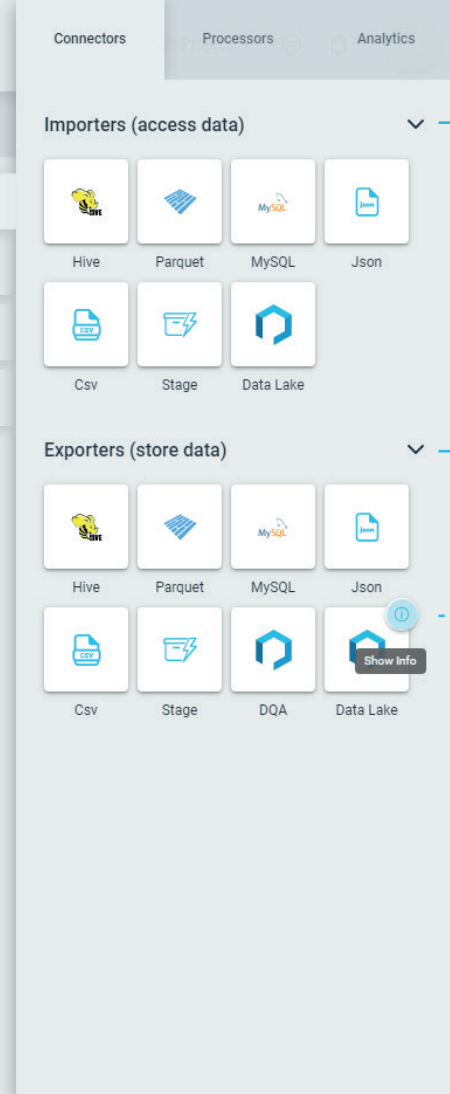

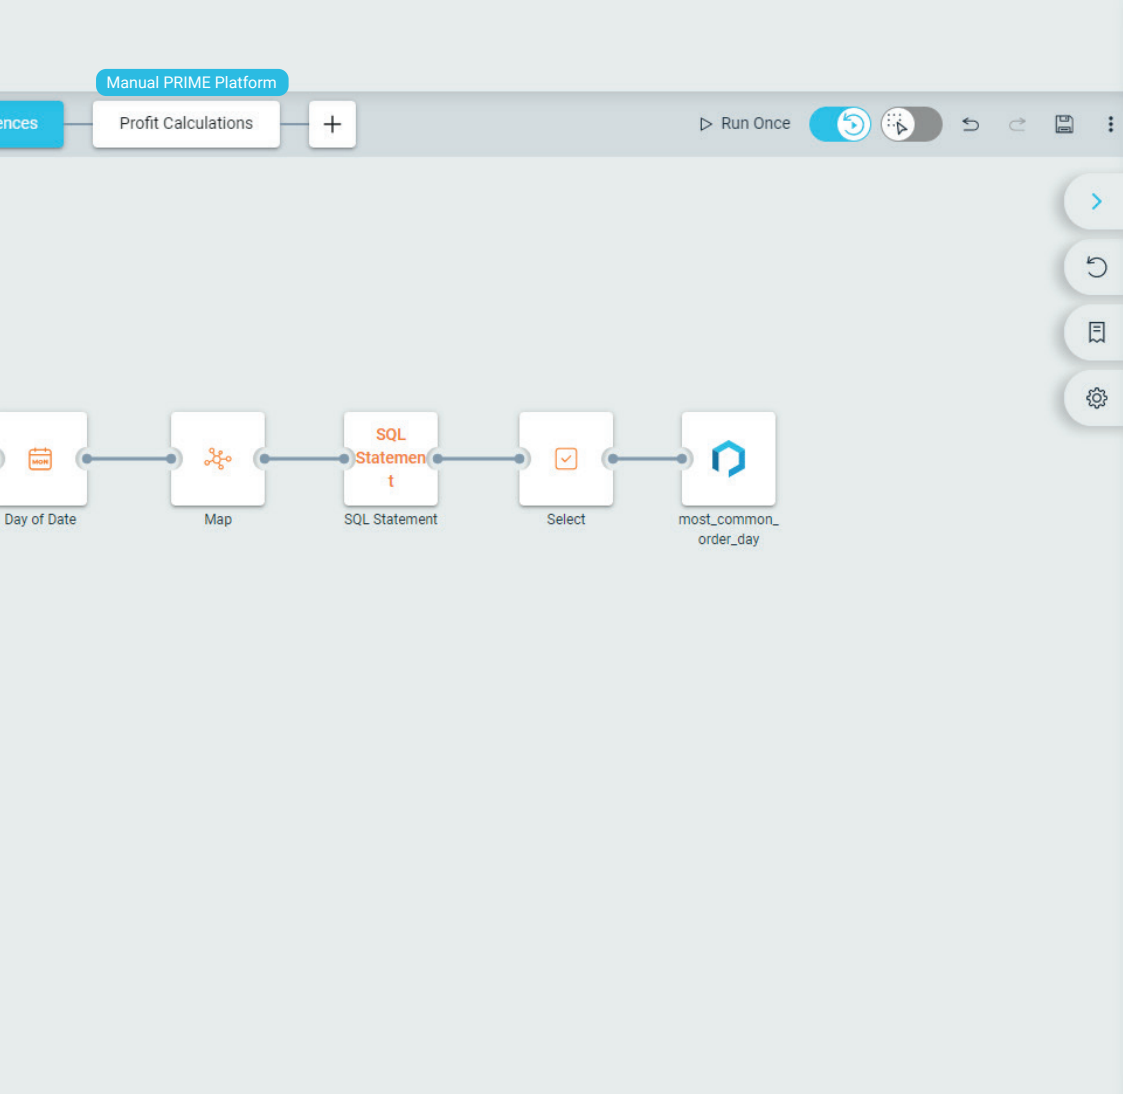

The module ports are not linked to other modules, or it is not configured.

### Red

The module configuration is missing some required information.

Import files from different file formats, cloud or local environment.

Export your data in all given formats.  
Use Prime Exporters for internal purposes!

To learn what a module does and how to configure it, click on the info button of the corresponding module.
